November Engineering Activity

Turkey Racing

Materials:
- Balloons
- Long String
- Duck Tape
- Drinking Straws
- Foam Paper
- Feathers
- googly eyes

Directions:
1. Cut a turkey shape out of the foam paper and decorate it with googly eyes and feathers.
2. Cut the drinking straw in half and put the string through it. Tie the string between two chairs. Make sure it's tight.
3. Attach the foam turkey to the drinking straw using tape, leaving a middle piece of tape sticky-side-out.
4. Blow up a balloon (do not tie it) and use the extra piece of tape to attach the balloon to the turkey.
5. When you're ready to race your turkey, let go of the balloon.
