MATERIAL SAFETY DATA SHEET

HAZARDOUS SUBSTANCE.
NON-DANGEROUS GOODS
Hazard classification according to the criteria of NOHSC.
Dangerous goods classification according to the Australia Dangerous Goods Code.

Section 1. Identification of Chemical Substance and Company

1.1. Product Identification: Photopolymer ABS Flex series
Including: ABS Flex Gray and ABS Flex Black
Product Class: Mixture acrylic and methacrylic acid esters and photoinitiator

1.2. USE OF SUBSTANCE: For use in Envision TEC’s family of Computer Aided Modeling Devices (CAMOD)

1.3. COMPANY: Envisiontec Inc.
15162 S. Commerce Drive
Dearborn, MI 48120
USA
Tel.: 1-313-436-4300
Fax: 1-313-436-4303

Date of Preparation: 26/09/2014

1.4. FOR CHEMICAL EMERGENCY: Spill Leak Fire Exposure or Accident
Call 1-313-436-4304

Section 2. Hazard Identification

Potential Human Health Effects:
This product is opaque color liquid with an acrylate odor, which may cause skin and eyes irritation. Inhalation of high vapor concentration may cause headaches and nausea.

Target Organs or Systems:
Skin, eyes, respiratory system, mucous membranes, and liver.

Route of Exposure:
Skin Contact: May cause skin irritation. Reddening and swelling may not occur immediately. It may also cause sensitization and allergic skin reaction in some individuals.
Eye Contact: May cause serious eye irritation. After eye contact may cause redness of eye tissue.
Inhalation: This product has low vapor pressure and volatility, which reduce potential for workers’ inhalation at room temperature and pressure. However, aerosols or vapors, which may be generated at elevated temperatures, may cause respiratory tract irritation, headache and nausea.
Ingestion: May be harmful if swallowed. Keep all food in area separate from storage and use locations. Prohibit eating, drinking and smoking in areas where there is a potential for significant exposure to this material. Thoroughly wash hands and face before eating.

Signs and Symptoms of Exposure:
Acute:
- **Skin Contact**: May cause irritation.
- **Eye Contact**: May cause irritation.
- **Inhalation**: Vapors may cause mucous membrane irritation, headache and nausea.
- **Ingestion**: May be harmful if swallowed.

Chronic:
- **Inhalation**: Prolonged or repeated overexposure may cause irritation, headache, and nausea.
- **Skin Contact**: May cause sensitization and allergic reaction.
- **Eye Contact**: May cause redness of eye tissue.
- **Ingestion**: May be harmful if swallowed.

Carcinogens:
Titanium dioxide is classified by IARC as Group 2B, possible carcinogen to humans. This product contains very low concentrations of titanium dioxide that is not in respirable form. There are no other carcinogens in concentrations of 0.1 percent or greater in this product.

**Potential Environmental Effects:**
Not readily biodegradable.

### Section 4. First-Aid Measures

**Emergency Overview:**
This product is opaque liquid with an acrylate odor, which may cause mild skin and eye irritation. The inhalation of high vapor concentration may cause a headache and nausea.

**Inhalation:**
In case of exposure to a high concentration of vapor or mist, remove person to fresh air. If breathing has stopped, administer artificial respiration and seek medical attention.

**Eye Contact:**
Immediately flush with plenty of water (under eye lids) for at least 20-30 minutes. Get medical attention immediately. Do not apply oil or oily ointments unless ordered by a
physician.

**Skin Contact:**
Remove contaminated clothing and wash contact area with soap and water for 15 minutes. Particular attention should be paid to hair, nose, and ears, and other areas not easily cleaned. If irritation develops, consult a physician.

**Ingestion:**
Ingestion unlikely. However, if ingested dilute with water by giving glasses of water to the victim then induce vomiting. Do not make an unconscious person vomit. Get medical attention immediately.

### Section 5. Fire-fighting Measures

**Flash point:** > 100°C / 237°F
**Method:** Setalash
**Ignition temperature:** n.d
**Lower explosion limit:** n.d
**Upper explosion limit:** n.d
**Extinguishing media:** Use carbon dioxide or dry chemical for small fires; aqueous foam or water spray for large fires.

**Special firefighting procedures:** Firefighters should wear full protection clothing and self-contained breathing apparatus (SCBA). Thoroughly decontaminate firefighting equipment including all firefighting apparel after the incident.

**Unusual Fire & Explosion:** Emits irritating vapors.
**Exposure Hazard(s):** Material: Irritant

### Section 6. Accidental Release Measures

**Procedures of Personal Precautions:**
Wear respirator, chemical safety goggles, and chemical gloves.

**Environmental Precautions:**
Contain spill to prevent spread into drains, sewers, water supplies, or soil.

**Methods of Cleaning Up:**
In the event of a spill, immediately remove all sources of ignition. Cover the liquid with inert absorbent. Using appropriate personal protective equipment and non-sparking tools, contain spilled material.

**Waste Disposal Method:**
Do not dispose to sewers, lakes, rivers or streams. Scoop all contaminated material into drums for proper disposal. Dispose of in accordance with all applicable federal, state and local environmental regulations. National or regional provisions may also be in force.

### Section 7. Handling and Storage

**Handling Precautions:**
**User Exposure:** Product may cause irritation. Avoid contact with eyes. Avoid prolonged or repeated contact with skin. Wash hands with soap and water before eating, drinking, smoking, applying cosmetics, or using toilet facilities. Launder contaminated clothing before reuse. Contaminated leather articles, including shoes, cannot be decontaminated and should be destroyed to prevent reuse. Solvents should never be used to clean hands or skin because they increase the penetration of the material into the skin.

**Storage Precautions:**
**Suitable:** Store in a cool, dry place out of direct sunlight, in opaque or amber containers. Store the containers at 10-35°C (50-95°F). Keep containers closed. Avoid ignition sources.
Special Requirements:
Do not heat containers with steam or electrical equipment. Heating this product above 300°F in the presence of air may cause slow oxidative decomposition; above 500°F polymerization may occur. Fumes and vapors from this thermal decomposition may be dangerous (nitrous vapors, carbon monoxide-carbon dioxide). Do not breath fumes.

The product may crystallize under cold conditions!!! Mild reheating for short period of time until the resin is clear is recommended.

Notations:
IOELVs = Indicative Occupational Exposure Limit Values
OEL = Occupational Exposure Limits
TLV = Threshold Limit Value
WEEL = Workplace Environmental Exposure Level by the American Industrial Hygiene Association

Exposure Controls:

Ventilation Controls:
Local exhaust is recommended to control exposure, which may result from operations generating aerosols and hot operations generating vapors. Mechanical exhaust is not recommended to control exposure for operations generating aerosols or vapors.

Respiratory Protection:
Respirators are generally not needed under normal conditions of use. If this material is handled at elevated temperature, under mist forming conditions or in case of accidental release of large quantities of product use a full-face respirator with multi-purpose combination (US) or type ABEK (EN 14387) respirator cartridges as a backup to engineering controls. Use respirators and components tested and approved under appropriate government standards such as NIOSH (US) or CEN (EU).

Protective Gloves:
Impervious gloves (nitrile or neoprene), clothing which covers any other exposed areas of the arms, legs and torso.

Eye and Face Protection:
Chemical splash goggles. A face shield is recommended during operations where splashing could occur.
Skin Protection:
Avoid all skin contact. Depending on the conditions of use, cover as much of the exposed skin area as possible by wearing gloves, aprons, long pants, and long sleeved shirts.

Other Controls:
For operations where contact can occur a safety shower and eye wash facility should be available. Always use good personal hygiene and housekeeping practices. Wash thoroughly after handling.

Environmental Exposure Controls:
Keep product from waterways and watersheds. This substance is not readily biodegradable.

Section 9. Physical & Chemical Properties

Section 10. Stability and Reactivity

Stability: Stable when stored in container designed for use with light sensitive materials under 35°C (95°F) in dark, cool place.
Conditions to Avoid: Storage >100°F, exposure to light, loss of dissolved air, loss of polymerization inhibitor, contamination with incompatible materials.

Storing or shipping under cold conditions may lead to crystallization and loss of resin clarity. Mild reheating for short period of time until resin is clear is recommended before use.

Materials to Avoid: Incompatible: Polymerization initiators, including peroxides, strong oxidizing agents, alcohols, copper, copper alloys, carbon steel, iron, rust, and strong bases.

**Section 13. Disposal Considerations**

Dispose of in accordance with governmental regulations (community, national or regional). Contact a licensed professional waste disposal service to dispose of this mixture. As with all foreign substances do not allow to enter the storm or sewer drainage systems. **Contaminated Packaging:** Dispose of as unused product.

**Section 14. Transport Information**

**Department of transportation classification:** Not hazardous by D.O.T. regulations
**D.O.T. proper shipping name:** Not regulated
**Other requirements:** N/A

**Australian HazChem Code:**
Acrylated monomer – 3Z

* All the components present in this product at concentrations equal to or greater than 0.1% are listed,
or excluded from listing, on the United States Environmental Protection Agency Toxic Substances Control Act (TSCA) inventory.

Substance Preparation Classification: **Harmful**

**Full Text of any R-Phrases and S-Phrases**

**Risk Phrases:**
- R20/22 – Harmful by inhalation and if swallowed
- R22 – Harmful if swallowed
- R36/38 – Irritating to eyes and skin
- R36/37/38 – Irritating to eyes, respiratory system and skin
- R41 – Risk of serious damage to eyes
- R43 – May cause sensitization by skin contact
- R48/22 – Harmful: danger of serious damage to health by prolonged exposure if swallowed

**Safety Phrases:**
- S2 – Keep out of the reach of children
- S7/9 – Keep container tightly closed and in well-ventilated place
- S22 – Do not breathe dust
- S23 – Do not breathe gas/fumes/vapour/spray
- S24/25 Avoid contact with skin and eyes
- S26 – In case of contact with eyes, rinse immediately with plenty of water and seek medical advice
- S29 – Do not empty into drains
- S36/37/39 – Wear suitable protective clothing, gloves, and eye/face protection

SARA 302: No chemicals in this material are subject to the reporting requirements of SARA Title III, Section 302.

Pursuant to Title III of the Superfund Amendments and Reauthorization Act of 1986, (SARA) and 40 CFR 372 Part 372, this product does not contain chemicals subject to the reporting requirements under Section 313.

California Proposition 65: This product does not contain chemicals which are known to the state of California to cause cancer.
