

Setting up microSD card

- Unmount card if it automatically mounts
 - e.g. `sudo umount /dev/sdc1`
- Partition the card
 - `sudo fdisk /dev/sdc` ← note no numeral
 - Follow instructions in handout
 - <http://www.gumstix.net/Overo/view/Overo-Setup-and-Programming/Creating-a-bootable-microSD-card/115.html>
- Format the new partitions
 - `sudo /usr/local/scripts/make-sdcard-filesystems`
- Mount new partitions
 - `sudo /usr/local/scripts/mount-sdcard`
- Install boot files
 - `sudo /usr/local/scripts/copy-prebuilt-palmtop`
- Setup home directory on card
 - `sudo /usr/local/scripts/create-myfolder`
- Unmount new partitions
 - `sudo /usr/local/scripts/umount-sdcard`
