

CHEN 4460 – MULTIMEDIA INSTRUCTION

Dr. Mario Richard Eden
Department of Chemical Engineering
Auburn University

August 2011

A major component of the course **CHEN 4460 Process Simulation, Synthesis and Optimization** consists of multimedia based instruction during the lab sessions. To obtain the full benefit of the multimedia encyclopedia accompanying the textbook *Product and Process Design Principles* by Seider, Seader and Lewin the use of headphones is required.

The Department of Chemical Engineering can provide headphones to the students enrolled in this class for use throughout the semester. The headphones must be returned to Dr. Eden at the end of the Spring 2011 semester. Failure to do so will result in you being held financially responsible for the loss.

By affixing my signature below, I acknowledge my responsibility for the set of headphones provided to me today. I agree to pay the sum of \$5.00, which will NOT be returned if I do not return the headphones in working condition upon completion of the CHEN 4460 and 4470 classes.
