Homework Guidelines (for handouts)

- All homework should be worked on engineering paper (front page only).
- Begin each problem on a new page.
- Staple handout on top of homework assignment.
- In every figure, all vectors, axes, etc. should be drawn with a straight edge.
- Vectors should have bar above variable, scalars should not.
- Axes should be drawn on figures.
- Keep up with units throughout problem.
- Draw a box around final answer.
- All writing should be neat and legible.
- Up to 20% will be taken off for neatness or formatting mistakes.
