

A history of innovation...
a vision for the future...

The 2008-2009 academic year marks the Samuel Ginn College of Engineering's centennial as an official college at Auburn University. This year, we celebrate a long history of innovation and achievement, as well as a clear vision for the future.

For more than a century, engineers have honed their skills at Auburn, going on to share their knowledge and innovation with the world around them. Our graduates consistently set themselves apart, becoming astronauts, inventors and CEOs, while revolutionizing the energy, transportation, biomedical and telecommunications industries.

As Alabama's largest and most prestigious engineering school, Auburn Engineering continues to build on its storied past while educating the next generation of engineers.

Auburn University is an equal opportunity educational institution/employer.
