## (ME) Manufacturing Engineer - Wind

### Position Information

**Employer:** GE Energy - Wind Energy [view profile]

**Division:** GE Energy

**Title:** (ME) Manufacturing Engineer - Wind

**Description:** BASIC QUALIFICATIONS

- BS degree in Engineering. Minimum GPA: 3.0.
- U.S. citizen or permanent resident.

**RESPONSIBILITIES**

- \* Develop and implement process improvements to reduce costs and cycles.
- \* Manage multiple projects by providing scheduling, resource management, budget control and Environmental, Health & Safety (EHS) compliance.
- \* Provide technical support for equipment to technicians.
- \* Specify and procure new equipment and tooling needed to meet production and quality requirements.
- \* Develop and maintain shop methods and procedures.
- \* Troubleshoot shop issues involving equipment, machinery and tooling and lead solution implementation.
- \* Support and/or lead production's drive for continuous improvement and change across three (3) shifts.

**DESIRED**

- Ability to influence and drive change.
- Effective at managing multiple priorities under tight deadlines.
- High attention to detail and accuracy.
- Ability to bring assignments to a successful completion.
- Effective communication skills for written and oral presentations.
- Strong analytical skills.
- Proficient computer skills.

**GENERAL**

GE Energy's wind turbine business located in Pensacola, Florida is one of GE's Imagination Breakthrough growth platforms. The business and technology challenges will provide strong professional growth opportunities and a dynamic innovative environment. Individuals seeking a small company environment inside the bigger GE will thrive in this diverse environment.

GE is an equal opportunity employer
