## (PQE) Product Quality Engineer - Wind

### Position Information

**Employer:** GE Energy - Wind Energy [view profile]

**Division:** GE Energy

**Title:** (PQE) Product Quality Engineer - Wind

**Description:** BASIC QUALIFICATIONS

- BS degree in Engineering. Minimum GPA: 3.0.
- U.S. citizen or permanent resident.

#### RESPONSIBILITIES

This position provides an opportunity to continuously improve product and process quality. In this position, the employee will team with Sourcing Quality Engineers, Production Engineers, and manufacturing Cell Leadership in the following tasks:

- Analyze product defects and drive root cause analysis, identifying necessary corrective actions.
- Own and manage non-conformance reporting process, ensuring rigor in dispositions, rework and vendor-bill-back.
- Lead weekly cross-functional quality sessions and track/drive corrective actions with suppliers, engineering and manufacturing.
- Assure compliance with ISO 9001, supporting internal, QUAD and 3rd party audits.

#### DESIRED

- Ability to influence and drive change.
- Passion for continuous improvement.
- Effective communication skills for written and oral presentations.
- Strong analytical skills.
- Proficient computer skills.

#### GENERAL

GE Energy's wind turbine business located in Pensacola, Florida is one of GE's Imagination Breakthrough growth platforms. The business and technology challenges will provide strong professional growth opportunities and a dynamic innovative environment. Individuals seeking a small company environment inside the bigger GE will thrive in this diverse environment.
