

Title: **Silicon Island Project and IT Product Development in Taiwan**

Speaker: Dr. Chin-Long Wey

Dean, College of Electrical Engineering and Computer Science

TSMC Distinguished Chair Professor

National Central University, Chung-Li, Taiwan

Date: Friday Feb 11

Time: 3:00pm

Place: Room 235 Broun Hall

Abstract:

The world market for electronic systems reaches \$1 Trillion and will further grow exponentially over the next five years. This presentation will briefly introduce the Silicon Island Project in Taiwan. The goal of this national Si-soft initiative is to make Taiwan become a unique integrated solution provider and the world's #1 semiconductor manufacturing and added-value design center. The talk also briefly describes current Information Technology product development in Taiwan and its future opportunities and challenges.
