

Matlab on Unix Machines

Unix Clusters Ramsay 113
 Shop Building 1

Once you log onto a Unix Machine (using your engineering account and password)
Note: This logs you onto your account, which can be accessed under the H: drive from a PC.

Click the far right button on the mouse to bring up *MENU* window

User Services -> User Setup

- Under module categories click on “math” (under module categories)
- Add math/matlab/6.1 (or what ever version you wish to use)
- Save & Quit

Again with the far right button to get the *MENU* window

User Services -> Make New Menu

Matlab should now appear under “Applications” when you bring up the *MENU* window.

Unix Commands

```
: mkdir mech4140
: cd mech4140
: pwd
: xterm &
: matlab
: cd
: rm filename.ext
: rmdir
: exit
```
