Auburn University
Department of Computer Science and Software Engineering
Lecturer Positions

The Department of Computer Science and Software Engineering (CSSE) invites applications for two full-time non-tenure track faculty positions at the level of Lecturer to begin in Fall 2019. The primary responsibility of a successful candidate for these positions is to teach a selection of courses in CSSE's undergraduate programs. The successful candidate will be expected to bring innovation and enthusiasm to teaching. Salary will be commensurate with the candidate's qualifications.

One position is for Auburn's online Bachelor of Computer Science degree program. The typical teaching load will be two 3-credit-hour courses per 8-week online term (5 terms per year). This is a 9-month appointment with the expectation that the selected candidate will teach during the summer term for additional compensation. Application link: http://aufacultypositions.peopleadmin.com/postings/3334.

The second position is for Auburn's on-campus bachelor's programs in Computer Science, Software Engineering and Wireless Engineering. The typical teaching load will be three 3-credit-hour courses per semester (fall and spring). This is a 9-month appointment with the possibility to also teach during the summer term for additional compensation. The summer teaching load will be up to three courses depending on departmental needs. Application link: http://aufacultypositions.peopleadmin.com/postings/3361

The minimum required qualification is a master's degree in computer science, software engineering, or a closely related field from an ABET accredited institution prior to the date of appointment. Applicants with (or close to the completion of) an earned PhD and teaching and/or industrial experience will be preferred. Excellent communication skills are required. We encourage candidates from all areas of computer science and software engineering to apply.

CSSE is home to the Auburn Cyber Research Center (http://cyber.auburn.edu), and is affiliated with the McCrary Institute for Critical Infrastructure Protection and Cyber Systems (http://mccrary.auburn.edu). The department currently has 21 full-time tenure-track and five teaching-track faculty members, who support strong undergraduate and graduate programs (M.S. in CSSE, M.S. in Cybersecurity Engineering, M.S. in Data Science & Engineering expected to begin in fall 2019, and Ph.D. in CSSE). Current student enrollment is over 1100 undergraduate and 175 graduate students. Faculty research areas include artificial intelligence, architecture, computational biology, computer science education, cybersecurity, data science, energy-efficient systems, human-computer interaction, Internet of Things, learning science, machine learning, modeling and simulation, multi-agent systems, networks, software engineering and wireless engineering. Further information may be found at the department's home page http://www.eng.auburn.edu/csse.

Auburn University is one of the nation's premier public land-grant institutions. It is ranked 52nd among public universities by U.S. News and World Report. Auburn maintains high levels of research activity and high standards for teaching excellence, offering Bachelor's, Master's, Educational Specialist, and Doctor's degrees in agriculture and engineering, the professions, and the arts and sciences. Its 2018 enrollment of 30,440 students includes 24,628 undergraduates and 5,812 graduate and professional students. Organized into twelve academic colleges and schools, Auburn's 1,450 faculty members offer more than 200 educational programs. The university is nationally recognized for its commitment to academic excellence, its positive work environment, its student engagement, and its beautiful campus.

Auburn residents enjoy a thriving community, recognized as one of the "best small towns in America," with moderate climate and easy access to major cities or to beach and mountain recreational facilities. Situated along the rapidly developing I-85 corridor between Atlanta, Georgia, and Montgomery, Alabama, the combined Auburn-Opelika-Columbus statistical area has a population of over 500,000, with excellent public school systems and regional medical centers.

Applicants for either position should submit a cover letter, curriculum vita, statement of teaching philosophy, unofficial transcripts and names (names only, letters not required at application time) of one to three references (teaching evaluations may also be submitted optionally) at the corresponding link above. Those who wish to apply for both should apply at both links. The review process will begin in March 1 2019 and continue until the positions are filled.

Selected candidates must be able to meet eligibility requirements to work legally in the United States at the time of appointment for the proposed term of employment. Auburn University is an Affirmative Action/Equal Opportunity Employer. It is our policy to provide equal employment opportunities for all individuals without regard to race, sex, religion, color, national origin, age, disability, protected veteran status, genetic information, sexual orientation, gender identity, or any other classification protected by applicable law.
