SPRING 2027 · NEW COURSE OPEN TO EVERY MAJOR

Wanna do AI?

Wanna show off your AI knowledge — and ace that interview?

All the AI hype getting you down?

Wanna get the facts?

No math? No code? No problem.

Whatever your major, freshman or senior — this course is for you.

COMP 1100

The Power of AI: Fundamentals to Applications

NO PREREQUISITES

SYLLABUS →

An accessible introduction to the technology and applications of AI for students in every discipline and at every level — no prior computer science, math, or programming knowledge required. You'll finish by using an AI model to solve a problem in a **hands-on project**.

WHAT YOU'LL EXPLORE

- History & principles of AI
- AI models
- Machine learning
- Neural networks
- Computer vision
- Natural language processing
- AI's impact across fields
- Benefits & limitations
- AI ethics
